DETAILED ACTION

Allowable Subject Matter

Claims 1-39 are allowed.

The following is an examiner's statement of reasons for allowance: Examiner agrees with Applicant's arguments. Regarding independent claims 1 and 27, the prior art fails to teach or fairly suggest the following in italics, in addition to the accompanying features of the claims, an apparatus for coupling light between an optical fiber and a substrate comprising *a waveguide grating coupler disposed on the substrate* and an optical fiber comprising a core and a cladding, with an angled tip, where the *angled tip of the fiber is positioned* on the surface of the substrate *with the core of the fiber parallel to the surface* of the substrate, and the *cladding on the longer side of the angled tip is adjacent to the surface* of the substrate and has a *reflective surface with an angle of less than 45 degrees to the surface of the substrate and the reflective surface is positioned adjacent to the waveguide grating coupler* disposed on the substrate. Applicant teaches that by specifically having the angle be less than 45 degrees, reflections back to the reflective surface from the surface of a chip are significantly minimized. Claims 2-26 and 28-39 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
